

Easy mounting of pre-masking tape onto electronic cuttable overlay film (ECOF).

ROLLROLLER®
— FLATBED APPLICATOR —

Let signs be made easy

Upgrade your traffic sign production

More than 150 traffic sign manufacturers have increased their productivity at least 100% by upgrading their production line to the ROLLROLLER Flatbed Applicator® technology. Behind the patented technology is 15 years of experience and product development. Today more than 2,500 commercial sign manufacturers are using the ROLLROLLER in their sign production and print finishing.

- Ergonomic and user friendly
- Time saving
- Flexible
- High precision
- 2 years warranty

" We've got over 20 ROLLROLLER's today. That says a lot about the results." Trond Aamodt, Euroskilt, Norway

Choose the right model

ROLLROLLER is available in thirteen different sizes divided on three models.

ROLLROLLER 540/170 Premium is our most sold model, if you produce high volumes of long guide signs you should consider the ROLLROLLER Traffic. Design with an aluminum flatbed which can be adjusted to fit different extruded panels. The ROLLROLLER Traffic is most often used in combination with a Basic or Premium model to create a complete workflow.
