### Cutting to perfection

The **smart object sorting feature** is designed to select the most optimal starting point for cutting objects, every single time. With its ability to consider the elastic properties of the material, it ensures perfectly cut objects at maximum speed from beginning to end.

In addition, the cutter has a unique **smart panelling function**. When panelling is set to 40 cm, all objects within this range are cut at once. This improves cutting accuracy and simplifies post-processing.

### Ease of Use

Discover improved ease of use with a blue, green and red lighted status bar, as well as blue parts indicating components that can be moved and adjusted and a tool tray at the back of the machine for efficient operation.

### TC MODEL

### Dual head

The high-precision cutting head can now carry two tools, allowing cutting through and kiss-cut or a combination with creasing, without changing tools.

### OPOS Camera

A more performant camera which is faster thanks to automatic data processing in the cutter instead of the external software.

### Optimized Media Handling

The media roll on the cutter can now handle a diameter of 20 cm and supports a roll weight of at least 32 kg. This improvement is **highly beneficial** for print and cut applications including laminated vinyl.

SERIES

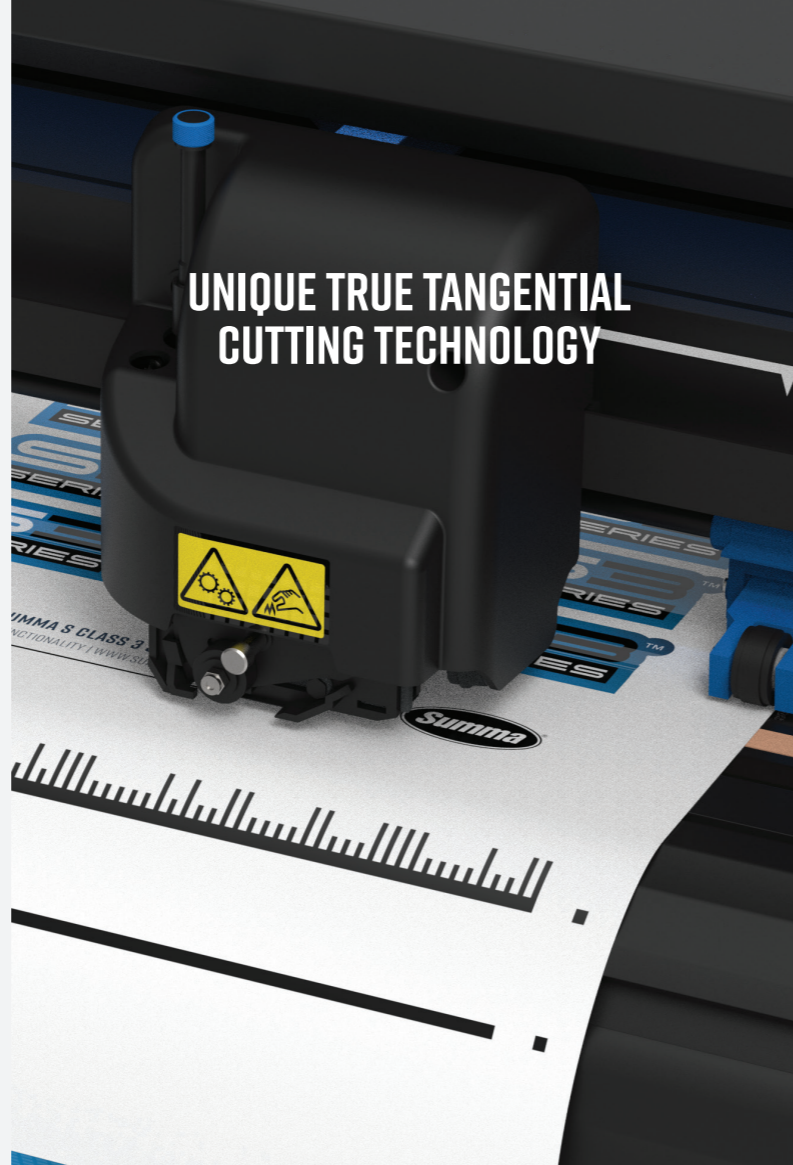

## HIGH-PRECISION & VERSATILE CUTTING

The Summa S Class 3 is a state-of-the-art device designed for professional users who demand top performance in their vinyl cutting applications. The range features Summa's advanced True Tangential Cutting Technology with a unique motorised knife, allowing the cutters to achieve unparalleled **accuracy and precision** down to the smallest details. Furthermore, the ability of thru-cutting, kiss-cutting and creasing, without the need for tool changes\* proves the cutter's versatility once more.

The S Class 3 cutters have an impressive axial speed of up to 1000 mm/s and a cutting force of up to 1000 gr that ensures high-quality, fast and efficient cuts.

\* TC version only

## DESIGNED FOR TOP PERFORMANCE

The Summa S Class 3 not only masters precision and versatility, it is also **a true workhorse** built to last. Constructed with high-quality materials and components, this machine can withstand heavy use and produce consistent results over time, giving you the confidence to tackle even the most demanding cutting projects.

Overall, the Summa S Class 3 is an excellent choice for professional users who require performance, precision and versatility in their cutting workflow. With its advanced technology, intuitive software GoSign, durable construction and timesaving features, it is sure to meet even the **highest user demands**.
