

HEXIS-SWISS.CH PRESENTS:

Seismo S20 DTF Powder Station

Seismo 20 is developed to tidy user's working space by shaking the powder manually, it is popular among the users who use their DTG printer to print DTF transfer in sheet. Together with DTF Station's Phoenix Air 4050 oven ,Seismo 20 would bring your DTF process to next level

Features

- Easy to operate
- Easy to maintenance
- Friendly for beginners
- Desk-top version but efficient

▶ VIDEO

Benefit

- No more manual DTF powdering. Simply load printed sheets, apply powder, and the Seismo S20 DTF Powder Station shakes the powder off to throw into your oven/ – conveyor dryer
- Similar to Pretreatment Machines for DTG, this DTF Powder Station takes the DTF printing process to another level, accelerating your workflow and your printing business

Compatible with

- Phoenix Air 4050
- All the DTF sheeting printing process
